

Project Title	Cybersecurity of Healthcare Improved in a X-border perspective
Project Acronym	CYBERHIMPRES
Project Number	101101322
Type of action	DIGITAL-SME
Topic	DIGITAL-2022-CYBER-02-SUPPORTHEALTH
Starting date of Project	01/01/2023
Duration of the project	24
Website	https://cyberhimpres.policlinicogemelli.it

D1.2 Project Website

Work Package	WP 1 Project coordination
Lead author	(FPG), Pasquale Mari (FPG)
Contributors	(FPG), Sabina Magalini (FPG), Lorenzo Marchesi (UCSC), Daniele Fieni (FPG)
Peer reviewers	Diana Navarro Llobet (FPHAG), Annia Lucina della Penna (FPG), Sabina Magalini (FPG),
Version	V1.0
Due Date	28/02/2023
Submission Date	28/02/2023

Dissemination Level:

X	PU — Public
	SEN — Sensitive
	R-UE/EU-R — EU Classified
	C-UE/EU-C — EU Classified
	S-UE/EU-S — EU Classified

The work described in this document has been conducted within the CYBERHIMPRES project. This project has received funding by the European Union Digital Europe Programme (DIGITAL) under grant agreement No. 101101322.

Disclaimer

CYBERHIMPRES has received funding from the European Union's Digital Europe programme under grant agreement No. 101101322. Views and opinions expressed are however those of the author(s) only and do not necessarily reflect those of the European Union. Neither the European Union nor the Granting Authority can be held responsible for them. Any use of the present document other than by the CYBERHIMPRES Consortium members and the European Union services in the framework of the Grant Agreement must be authorised by the Consortium governing bodies.

Executive Summary

The website of the CYBERHIMPREX project is on-line as of February 28th, 2023 at <https://cyberhimprex.policlinicogemelli.it>.

A hardcopy of the website is produced under the form of a Report in the present deliverable. This contains screenshots of the main sections. The main sections (and subsections) are:

About

- Overview
- Objectives
- Partners
- Contact us

Resources

- Documents

The site provides the following credit and disclaimer

CYBERHIMPREX has received funding from the European Commission-EU under the Grant Agreement no. 101101322. The content of this website does not represent the opinion of the European Union, and the European Union is not responsible for any use that might be made of such content.

Table of Contents

EXECUTIVE SUMMARY	3
1. INTRODUCTION.....	5
2. SCREENSHOTS	6

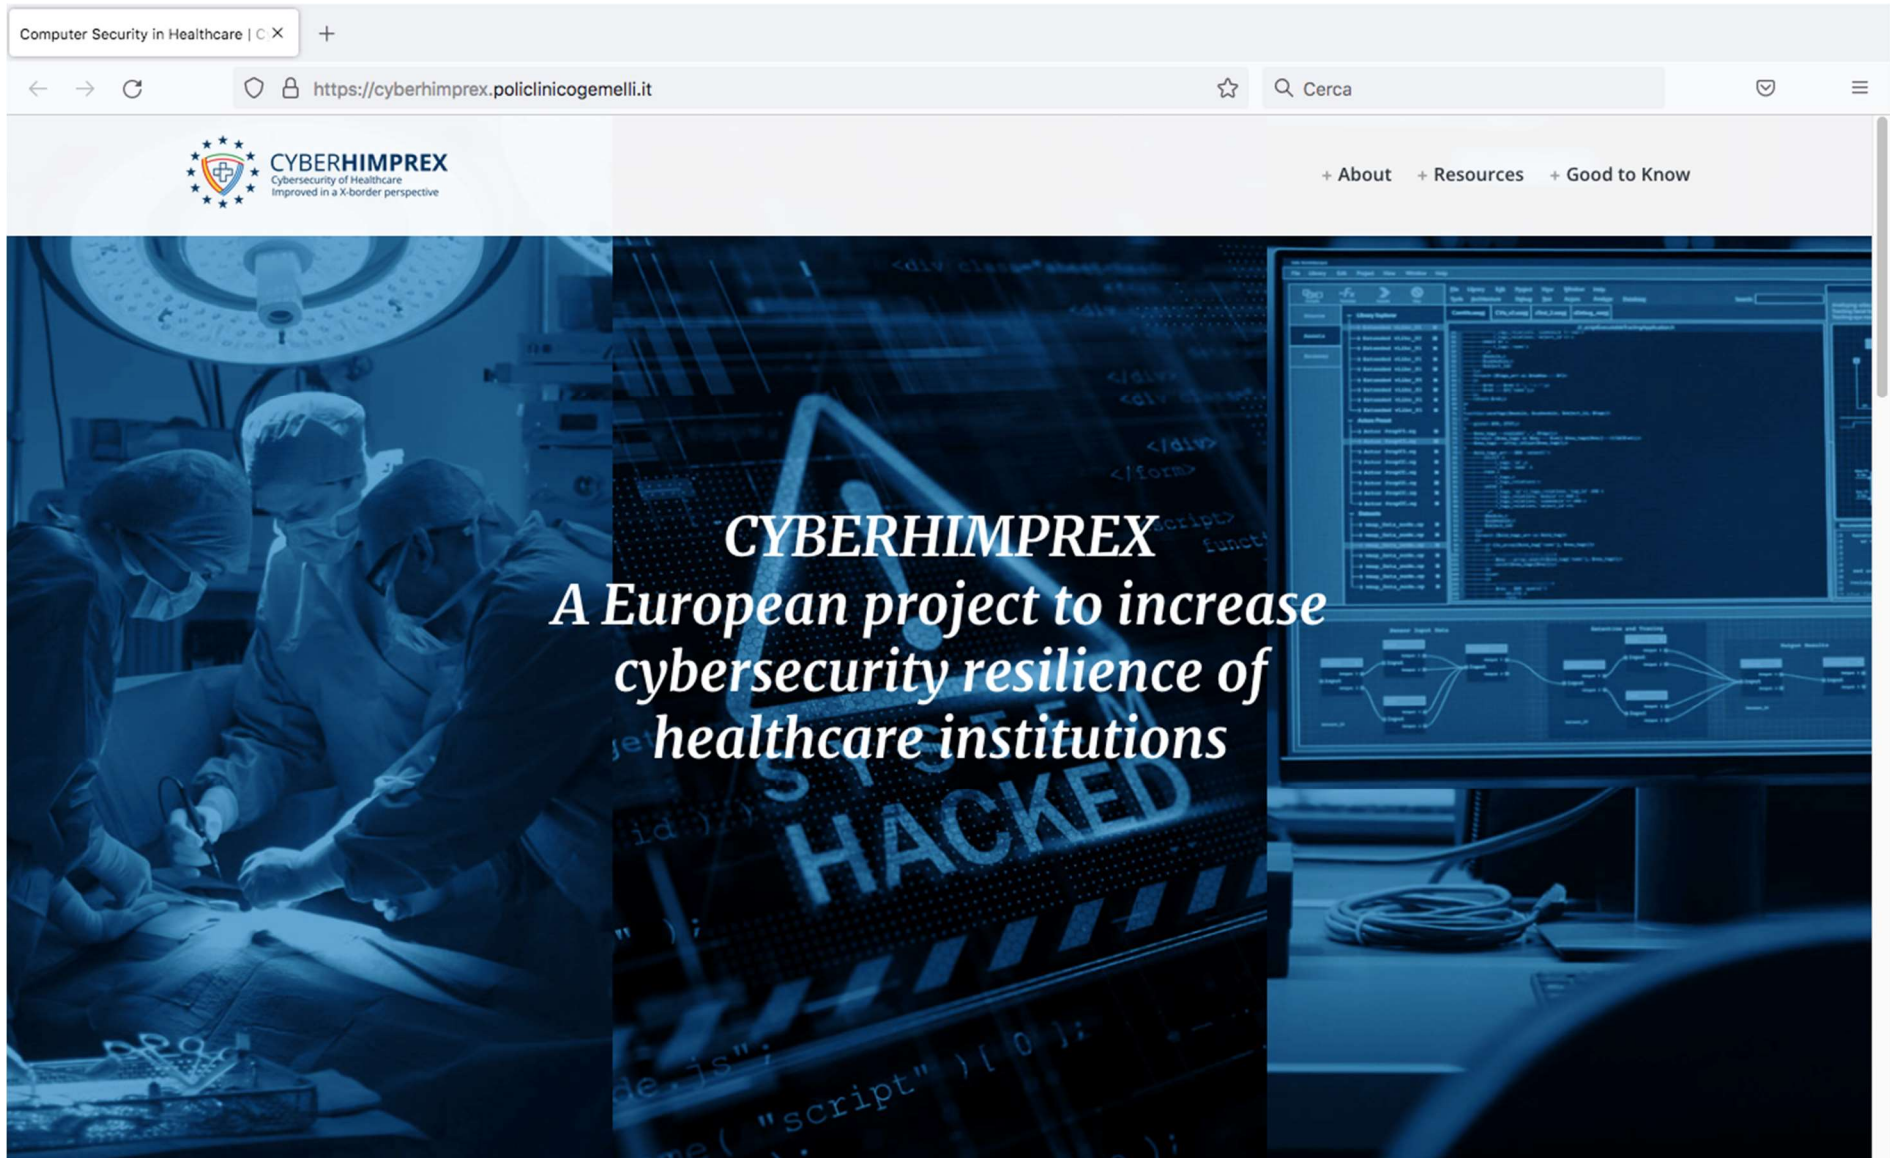

1. Introduction

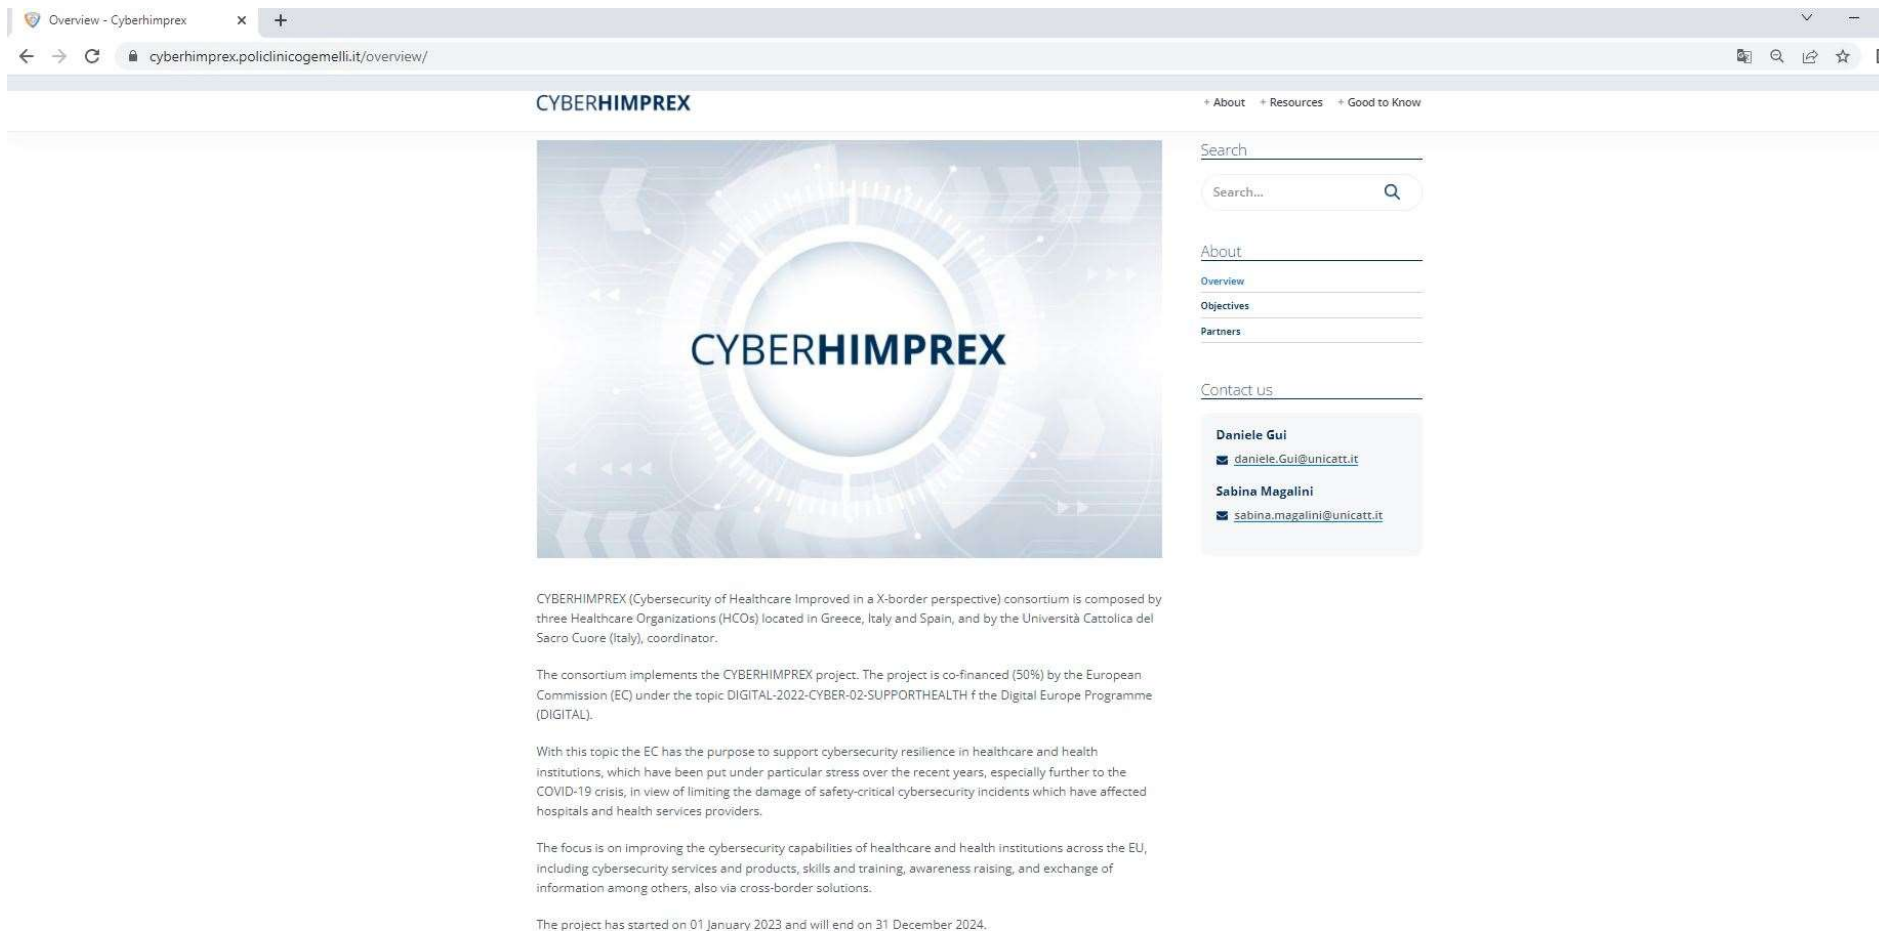

The site <https://cyberhimpres.policlinicogemelli.it> was developed by the Fondazione Policlinico Gemelli. Contents, development and technical implementation were performed by FPG staff and an external provider (Keyformat srl), while UCSC staff contributed to the present hardcopy deliverable. The site is hosted on a publicly available area of the policlinicogemelli.it domain.

It is, at the time of writing, work in progress because of the dynamic feature of its contents which, during the life of the project, will evolve and be enriched by new additions, especially in the Resources and Good to Know sections.

It represents a valuable instrument for all divulgation and communication activities and to reach the objectives and scopes of the project. This introduction is followed by a series of screenshots which represent a selection of pages of the website at Day 1. Starting exactly from Day 1 the contents will be under a continuous updating activity.

CYBERHIMPREX (Cybersecurity of Healthcare Improved in a X-border perspective) consortium is composed by three Healthcare Organizations (HCOs) located in Greece, Italy and Spain, and by the Università Cattolica del Sacro Cuore (Italy), coordinator.

The consortium implements the CYBERHIMPREX project. The project is co-financed (50%) by the European Commission (EC) under the topic DIGITAL-2022-CYBER-02-SUPPORTHEALTH of the Digital Europe Programme (DIGITAL).

With this topic the EC has the purpose to support cybersecurity resilience in healthcare and health institutions, which have been put under particular stress over the recent years, especially further to the COVID-19 crisis, in view of limiting the damage of safety-critical cybersecurity incidents which have affected hospitals and health services providers.

The focus is on improving the cybersecurity capabilities of healthcare and health institutions across the EU, including cybersecurity services and products, skills and training, awareness raising, and exchange of information among others, also via cross-border solutions.

The project has started on 01 January 2023 and will end on 31 December 2024.

CYBERHIMPRES project has the objective of improving the cybersecurity capabilities of the three HCOs, also leveraging cross-border solutions, implementing a portfolio of 11 initiatives.

The portfolio is inspired by the vision that the cybersecurity is obtained acting, according to a socio-technical approach, on HCO's People, Organization/Processes, Technology.

The project also leverages the inter-organizational exchange of data and knowledge. Two initiatives will be implemented jointly by the HCOs: 1) Set-up a cross-border inter-organizational secure data sharing capability via a new tool, 2) Improve cybersecurity orientation of the procurement process via alignment with ENISA guidelines.

7 of the 11 initiatives adopt solutions that have been developed by two H2020 projects: CUREX and PANACEA. The Coordinator and the three HCOs have been partners of these projects.

UNIVERSITÀ CATTOLICA del Sacro Cuore

Università Cattolica del Sacro Cuore

Founded in 1921, the Università Cattolica del Sacro Cuore (Catholic University of the Sacred Heart) is one of the most renowned universities in Italy for its academic excellence. As an EU project leader on cybersecurity and close collaboration with its teaching Hospital Fondazione Policlinico Universitario Agostino Gemelli IRCCS, it brings vast experiences in delivering training and healthcare excellence. It has coordinated the H2020 PANACCA project and it is a member and coordinator of PHICAS, the PANACCA Healthcare Advisory Service.
<https://www.panaccaresearch.eu>

Gemelli

Fondazione Policlinico Universitario "A.Gemelli"

Founded in 1964, Fondazione Policlinico Universitario "A.Gemelli", or FPG for short, is an academic medical centre operating in all areas of health and clinical care and is one of the most important and internationally acclaimed healthcare providers in Italy. Caring for thousands of patients every year, it is staffed by ICT experts and network teams responsible for implementing cybersecurity and maintaining system state of the art, legal experts responsible for Data Protection compliance and a clinical engineering department. With highly qualified staff on board, FPG has brought extensive experience and expertise on all facets of cybersecurity in healthcare, testing the tools developed in the H2020 PANACCA project, also bringing key insights to other healthcare organisations and policy makers.

It is a member of PHICAS, the PANACCA Healthcare Advisory Service.
<https://www.panaccaresearch.eu>

Hospital General de Granollers

Fundació Privada Hospital Asil de Granollers

The Fundació Privada Hospital Asil de Granollers, or FPHAG for short, is a healthcare, socio-sanitary and social care center, integrated into the comprehensive healthcare system of Catalonia. FPHAG comprises several centres and is led by a Patronage and a Board of Directors. The Foundation is made up of the Geriatric Center Adolfo Murialdo and the General Hospital of Granollers, which provides health care assistance both for acute and non-acute patients and is the reference hospital of the territories comprising the area known as Valles Oriental, covering a population of around 400.000 people and with a total number of beds of 340. It has been partner of the H2020 CUREX project <https://curex-project.eu>

7th Health Region of Crete

7th Health Region of Crete

The 7th Health Region of Crete, or 7HRC for short, is the regional authority responsible for the specification/development of health policies. It is the only health region in Greece operating an Integrated Health Information System used by all hospitals and primary health care units, spanning Health Centres and Urban Primary Health Care Units, which are interconnected. In PANACCA, it brought extensive knowledge of operational practices in healthcare and experiences in digitising services with cybersecurity top of mind. With highly qualified staff on board, 7HRC has helped define requirements and testing the tools developed in the H2020 PANACCA project. It is a member of PHICAS, the PANACCA Healthcare Advisory Service.

The screenshot shows a web browser window with the address bar displaying 'cyberhimpres.policlinicogemelli.it/documents/'. The website header includes the CYBERHIMPRES logo and navigation links for 'About', 'Resources', and 'Good to Know'. The main content area features a dark blue banner with the word 'Documents' in white. Below this, a breadcrumb trail reads 'Home / Documents'. The primary article is titled 'Introductions to the European and to the Italian ISACs for the Healthcare sector.' and describes a kick-off meeting in Rome. It lists two speakers: Wim Hafkamp and Luca Nicoletti, with links to their respective documents. A search bar and a 'Resources' sidebar are also visible. The footer contains navigation links for 'About', 'Resources', 'Good to Know', and 'Credit and Disclaimer', along with a European Union logo and funding information.

CYBERHIMPRES

2-3 February 2023

CYBERHIMPRES project kick-off meeting took place in Rome in Gemelli hospital premises. The meeting has involved representatives from all four CYBERHIMPRES Consortium partners.

Three key stakeholders provided input to the project, participating in presence (representatives of the Italian National Cybersecurity Agency) or connecting on line (the chair of the EH-ISAC, the Project Officer of the project).

Also representatives from two H2020 Projects (PANACEA and CUREX) provided a description of some of the innovative cybersecurity solutions that will be considered for up-taking during the project: RHEA, RINA, University of Abertay, University of Piraeus.
